## Attractive on the outside, innovative inside

Geberit's range of washbasin traps, bath fillers and popups strikes the perfect balance between form and function, combining outstanding performance with striking aesthetic qualities that enhance the look of any bathroom.

- Stylish design with a chrome finish. Its conic design adds the finishing touch to all wall-hung washbasins.
- The in-built hydraulic element directs water in a constant and direct stream towards the waste pipe creating a self cleaning effect.
- Easy installation. The waste pipe fits on to the trap with an audible "click" and can be cut to size. As we use plastic, corrosion is not an issue and you get years of trouble free performance.
- 1 1/4" BSP waste connection and 32mm outlet.  
Comes with 32mm – 1 1/4" adaptor.

## Safe and reliable, with excellent functionality

Geberit bath trap assemblies have been tried and tested in millions of applications; the water is emptied from the tubs reliably and without the typical gurgling noise.

150.535.21.1 Chrome popup (standard) with bath trap and overflow

150.536.21.1 Chrome popup (large) with bath trap and overflow

150.712.21.1 Chrome popup and filler (standard) with bath trap and overflow

150.713.21.1 Chrome popup and filler (large) with bath trap and overflow

- Suitable for all standard sized tubs and also available for large baths.
- Trap can be opened and closed by turning the overflow rosette without having to immerse hands in the water.
- Easy installation
  - 360° connection of waste pipe.
  - Flexible head to allow firm connection.
- Chic design of turn handle and popup cover.
- Easy to clean.
- Flow rates
  - 1 bar = 18 litres per minute
  - 3 bar = 31 litres per minute
- 40mm outlet. Comes with 40mm – 1 1/2" adaptor.

## Innovative designs that are unique and practical

- The trap is released and sealed by a push-button control located in the overflow rosette.
- The push actuator lies flush to the bath tub thus creating a more comfortable environment when sitting in the bath tub.
- Suitable for most UK standard bath tubs.
- Easy Installation: Tools for installation are provided with trap.
- The lower trap enables the inlet height to be lowered.

**150.770.21.1** PushControl bath trap, overflow chrome popup waste standard bath tubs

**150.771.21.1** PushControl bath trap, overflow chrome popup waste long bath tubs

**150.772.21.1** PushControl bath trap, overflow chrome popup waste high bath tubs

## Timeless design and the highest quality

- Elegant, eye-catching design with chrome cover.
- Reliable, empties water from flat and even extremely flat trays.
- 52mm: for flat shower trays with drain hole dia. 50mm, flow rate 0.58l/s.
- 90mm: for extremely flat shower trays, popup cover can be removed and taken out for cleaning the trap. Flow rate 0.5l/s.
- 40mm outlet. Comes with 40mm – 1 1/2" adaptor.

**150.688.21.1** Chrome covered shower tray trap and waste (50mm)

**150.679.21.1** Chrome covered shower tray trap and waste (90mm)

With a strong commitment to quality, all Geberit traps meet stringent quality control standards to ensure customer satisfaction every time. Dirt can often get caught up in conventional traps, causing the water flow to slow down and eventually clog the drains. The specialised design of Geberit traps offers a combination of convenience, outstanding performance and the finest workmanship which you won't find elsewhere. All traps are made of sturdy, non-corrosive polypropylene and can be easily cleaned.

## Uniflex shower channel

The Uniflex shower channel and shower drain are the perfect finishing touch for wet room installations. The channel is fixed to the floor with adjustable feet so that it can be installed efficiently and insulation layers laid tidily. The two Uniflex shower channel designs, based on the popular materials stainless steel and enamel, provide a stylish finish to modern bathrooms. In addition, the shower channel can also be installed with other materials such as wood, Corian® or the tiles already used in the bathroom.

The height, inclination and offset of the channel frame can be adjusted to suit the thickness and size of tiles, incline and the tile grid.

- Drainage capacity of 0.8l/s.
- High flexibility and error tolerance.
- Complete acoustic and tension decoupling.
- Minimum construction height 112mm.
- Available in lengths of 700, 800, 900, 1000, 1100, 1200mm as standard.
- Two versions available for in-floor and against the wall installations.

### Uniflex shower channel - room

Size	Product code

## Uniflex shower drain

The Uniflex shower drain for wet room installations has a minimum installation depth of just 95mm and maximum depth of up to 195mm. It comes with a choice of seven different grating designs that range from the more traditional 'classic' style to the modern 'trendy' version, making it the perfect finishing touch for any interior theme.

Installation is made easy through floor fixings for exact positioning, and once the flooring has been laid, the incline of the Uniflex floor channel can be adjusted as well as the height and horizontal position.

- Drainage capacity of 0.74l/s.
- Floor fixings to enable exact positioning.
- Comes with 1½" waste adapter - UK size.
- Minimum construction height 95mm maximum 195mm.
- Screwable standard grating option available.
