Geberit shower element with wall inlet

Innovative system technology for wet rooms

KNOW:

Just because it works,
doesn't make it ideal.

HOW:

The innovative new wall inlet from Geberit: stylish and practical

**KNOW
HOW
INSTALLED**

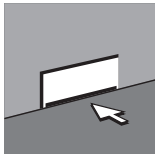

Geberit integrates the drainage for wet room showers into the wall without building into the floor. The Geberit shower element is another innovative addition to the Geberit Duofix range.

An alternative solution to traditional wet room drainage, the new shower element from Geberit integrates the drainage into the wall, thus avoiding having to build into the floor which can be a costly and time consuming exercise. Now you can have all the benefits of Geberit know-how in the shower area.

Advantages at a glance

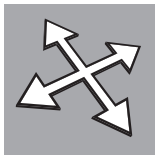

Wall inlet

Concealing the drain in the wall and integrating it into the Geberit Duofix system significantly reduces installation time and workload.

Leakproof

The shower element features a sophisticated sealing system that guarantees a leakproof shower area for years to come. Connections between the individual components are flexible to eliminate tension.

Flexible

Various components and fittings on the frame can be adjusted giving maximum flexibility during installation.

Stylish

The discrete design wall covers are available in brushed stainless steel, gloss chrome, white and even a bespoke option that allows the cover to be fashioned to any bathroom theme.

Easy to clean

Concealed by the design cover is a hair trap that can be removed for hassle free maintenance.
